Hey Chad,

Would you be willing to put me in touch with staff who could help with data for Upper Columbia for this request from Jim? Appreciate any help you can provide!

Cheers,

Evan

Subject: U.S. PST Economic Study

Hi Evan – the U.S. has contracted with a consultant to assess the economic value of PST **salmon** (don't include steelhead) fisheries. Commercial catch data and marine recreational fishing effort data are easily accessible, but as usual the freshwater recreational fishery is a bit more challenging. For 2022 through 2025, the consultant has requested:

Year
River
Mode (private, guided)
Location (boat or bank)
Angler Days

Thoughts on how we might respond. Recognize that we will need to extrapolate from creeled rivers.

Thanks.
Jim
